For all of these options, fill out only the information that can be answered at this time.

OR **Yes, site was determined to be a Brownfield.**

If yes, fill out all information requested.

Assigned site number: N005

Site Name: Nightmute Post Office

GPS Location: N60°28.778' W164°43.741'

Descriptive Location: City of Nightmute's Postal Service building (post office)

General site description, with brief history of use:

The Nightmute post office is located near NTC and City of Nightmute offices; the post office is a dark green building with small sign hanging above. The post office was known to be the first clinic back in the mid 70's. The building is old and behind it is the hillside, it is known that water points drain downward to the river (water passes down under certain areas to the river).

Buildings on site: Nightmute Traditional Council - to the right, Edwin Tulik-community resident (in front of Post office building), John George-community resident (right across boardwalk from Post Office building).

Approximate site size: *acres OR 25 feet wide by 30-40 feet long*

General shape/size comments: It's like a square boxed area throughout that area.

Potential or suspected contaminants (or wastes containing contaminants):

The ground within that area surrounding the post office - the ground appears to be stained by contaminated soil with petroleum residue/colored oil/fuel stains, stinks with odor, little/or no grass grows in that area. We can only see this during the summer seasons. We don't see anything during the winter seasons. For the residents living close by
